

FLIGHT TEST SAFETY WORKSHOP 2022

THE
FLIGHT TEST SAFETY COMMITTEE

invites all flight test professionals to join us in London for the 2022 Flight Test Safety Workshop at the Royal Air Force Club in London's famous district of Mayfair.

The Workshop's theme will be:

IMPROVING FLIGHT TEST SAFETY THROUGH ENHANCED SAFETY RISK MANAGEMENT

TUTORIAL:

An interactive tutorial workshop session will provide for delegates hands-on work to generate, evaluate, and present aspects of safety management in tutored groups to improve their organisation's safety management systems and processes.

PRESENTATIONS:

Target presentation length should be 20 minutes. The committee hopes all already submitted presentations will still be able to be considered for 2022, with new proposals very much welcome. Please send presentation/briefing proposals, or send any questions concerning presentations to the Workshop's Technical Chairman, Mark Purvis via mark.purvis@novasystems.com.
