

# CALL FOR PAPERS

## 35th Annual Symposium SFTE European Chapter 8-10 May 2024, Vienna (Austria)

Did you know that the **dry alkaline battery** was co-invented by Austrian **Karl Kordesch** in the 1950s?

In the 1970s Karl even fitted a hydrogen fuel cell to his private car! Clearly Austrians have understood the environmental challenges facing our society for many years and that's why the SFTE-EC is delighted to be heading to Vienna to exchange on current and future flight test initiatives linked to sustainable energy sources. Papers linked to this and other topics at the forefront of flight test engineering are welcome!

- Deadline for **abstract submissions:**  
**February 1, 2024**
- Abstract selection:  
March 1, 2024
- **Final paper submission:**  
**April 1, 2024**

All abstract submissions,  
as well as questions  
regarding the content to:
